

## **Linea di ricerca 4**

### **EMATOLOGIA, ONCOLOGIA E TERAPIE CELLULARI**

---

#### **Responsabili scientifici:**

Carlo Dufour, Alberto Garaventa, Mirco Ponzoni

#### **Descrizione:**

Le aree di ricerca trattate in questo settore, riguardano A) i tumori solidi e tumori del sangue pediatrici (es neuroblastoma e leucemie) B) e le patologie di origine non tumorale, C) la fisiopatologia del sistema ematopoietico e delle cellule staminali. I punti focali di indagine sono: la caratterizzazione dei meccanismi alla base delle recidive della malattia, dall'altra la messa a punto di protocolli terapeutici innovativi basati su terapie cellulari e farmaci biologici intelligenti, lo studio delle basi biologiche e la fisiopatologia come piattaforma per sviluppare terapie innovative. Le insufficienze midollari sono un gruppo eterogeneo di malattie genetiche congenite, causate da deficit nel numero di cellule del sangue. Sebbene la percentuale di guarigione da neoplasie del sangue va aumentando, alcune forme tendono a recidivare. Il trapianto di cellule staminali ematopoietiche (HSC) è raccomandato nei pazienti con forme severe di citopenia e nei pazienti leucemici più gravi e refrattari. Nel paziente trapiantato si instaura un complesso processo di ricostituzione immunologica che dà origine ad un sistema immunitario sano e funzionale. Il 30% dei pazienti affetti da neuroblastoma (NB) decede o va incontro a complicazioni tardive post-trattamento. E' quindi necessario trovare nuovi target terapeutici per i casi di NB refrattario mirati contro i meccanismi di resistenza alla terapia. Nell'ambito dei tumori pediatrici, è stato dimostrato che una parte importante di pazienti "guariti" sviluppano patologie degenerative. L'eterogeneità delle insufficienze midollari rende necessaria un'approfondita indagine dei geni responsabili di malattia e della relativa funzione. All'interno dei tumori risiedono cancer stem cells (CSC) resistenti alla chemioterapia. L'Istituto, sta cercando di identificare marcatori molecolari associati alle CSC del NB per elaborare strategie terapeutiche CSC-specifiche. Una percentuale significativa di pazienti guariti da tumore pediatrico sviluppa patologie degenerative, probabilmente associate a lesioni molecolari indotte dalla chemio-radioterapia. La loro identificazione potrebbe cambiare lo scenario terapeutico in questo tipo di patologie post-tumore. Poiché il trapianto di cellule ematopoietiche comporta espansione di queste cellule, lo studio delle variazioni del profilo trascrizionale dei geni delle HSC dopo trapianto (post-T) potrebbe rivelare informazioni importanti per espandere le stesse HSC per scopi terapeutici.

#### **Obiettivi:**

1. Sviluppo di nuovi approcci diagnostici e terapeutici nei casi più gravi di tumori solidi e di insufficienze midollari.
2. Identificazione di nuovi target nel NB.
3. Caratterizzazione delle alterazioni molecolari patogenetiche delle patologie degenerative post-tumore.
4. Caratterizzazione a livello molecolare della espansione delle HSC.

**U.O.C. Laboratorio cellule staminali post-natali e terapie cellulari**

Direttore: Marina Podestà

“Ageing e Orologio Biologico - Ageing and biological clock”

“Sviluppo di strategie metaboliche nella terapia di patologie oncologiche, autoimmunitarie ed infiammatorie - Development of metabolic strategies in the therapy of oncologic, autoimmune, and inflammatory diseases”

“Transdifferenziazione dei linfociti T  $\gamma\delta$  in T  $\alpha\beta$ : una nuova strategia immunoterapeutica contro le leucemie acute pediatriche - Transdifferentiation of  $\gamma\delta$  T lymphocytes into  $\alpha\beta$  T cells: a new immunotherapeutic strategy against pediatric acute leukemias”

“Lo studio del ctDNA nella diagnosi e nel monitoraggio della resistenza alla terapia in pazienti con Neuroblastoma ad alto rischio: le basi della medicina di precisione in oncologia pediatrica - The study of ctDNA in the diagnosis and monitoring of resistance to therapy in patients with high-risk neuroblastoma: the foundations of precision medicine in pediatric oncology”
